Algebra 1 - Unit 1.6B: Chapter 7 Systems of Equations and Inequalities

1. Title each page with the section number and the assignment description. Include the date as part of your heading.
2. For each problem, write the original information. Show all process steps. Circle or box in the final answer. Use pencil.

Essential Questions within the Learning Targets:
- Are there real world meanings to solutions of systems of equations and inequalities?
- Is there more than one way to find commonality in multiple, related, real world situations?
- Is it possible to know ahead of time which method for solving a system is best for a given situation?
