

1ST DAY OF SCHOOL WARM-UP
★ = EXTRA CREDIT
DUE: MONDAY, 25 AUGUST 2014

Find these FIVE numbers (and some facts about me).

1. The first number and the second number are consecutive prime numbers.
 2. The sum of these two numbers is between two consecutive prime numbers.
- 🍏 The first number is the number of children I have.
 - 🍏 The second number is the number of people in my household.
 - 🍏 The third number is the age I was when my family moved to Alaska.
 - 🍏 The sum of the first number and the third number is the number of years I have been teaching, the number of years I've been married, and it is also a prime number!
(☺ THIS IS THE FOURTH NUMBER)
 - 🍏 The sum of the 2nd number and the third number is the age I was when I began studying in college to be a teacher. It's ones' digit is the number of leap years there have been since I was born, and it's also a prime number. **(☺ THIS IS THE FIFTH NUMBER)**
 - 🍏 If you add twice the 3rd number to twice the 2nd number and subtract this sum from twice the first number, the difference is the number of years I've been a Christian as well as the number of years I've been in Alaska.
 - 🍏 The sum of the first three numbers is the age I was when I started teaching.
 - 🍏 The mean of all five of these numbers is the 3rd number.
 - 🍏 The sum of the first number and the third number is the number of letters in the names of three of your Team Hunter teachers. The sum of the second number and the third number is the sum of two of your Team Hunter teachers.
